

# PLEIN AIR ARTISTIC PHOTOGRAPHY

**Level: Novice and Intermediate**

## **Description**

Still life photography often involves moving objects around in a controlled indoor environment to achieve a specific composition and effect. In this workshop, the tables are turned and you will be in an uncontrolled outdoor environment where you are the one moving around to achieve the same result using the fixed subjects at hand.

This is not intended as a landscape photography workshop but rather as a means of challenging yourself to move beyond simply documenting your environment and to progress into looking at the world around you from an artistic perspective.

## **Requirements**

Requirements: Any digital camera (including cell phones with a good image sensor) and the ability to perform basic editing (cropping, and adjusting brightness, contrast, and saturation).

## **Details**

Workshop details are not yet available.
